

A brief guide to mushrooms

Mushrooms that every veterinarian ought to know

Coriolus versicolor

An immunologically active beneficial mushroom with antiviral, antibacterial and potent immunostimulating properties. Coriolus versicolor helps to fortify the entire organism.

Agaricus blazei Murrill

This mushroom is immunologically active and has an immuno-stimulating and immuno-modulating effect. It also enhances physical and mental resilience.

Shiitake

The shiitake beneficial mushroom displays remarkable immunological activity, because it can both stimulate and regulate the immune system.

Glückspilz – the lucky guy

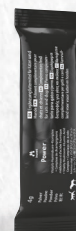

This lucky guy is just always healthy, nothing is going to knock him off his feet. Anyone he meets on his walk senses his radiance – his vitality, his wagging tail, his perky ears! This lucky toadstool puts a smile on everyone's face.

inuvet

Power

Power contains beneficial mushrooms and humic acid. Its ingredients are known to strengthen the immune system and protect mucous membranes. Suitable for animals suffering from allergies.

Power

Power contains beneficial mushrooms and humic acid. Its ingredients are known to strengthen the immune system and protect mucous membranes. Suitable for animals suffering from allergies.

Power is designed to support the immune system. It contains valuable beneficial mushrooms that are known to strengthen, stimulate and regulate the immune system. The so-called shell-broken process is used in the processing of the vitality mushrooms to improve the absorption of the nutrients they contain. In this process, the mushrooms are finely ground to break down the cell walls – this improves the absorption of its components. It also contains humic acid, which serves as protection for the mucous membranes. The product is suitable for animals suffering from allergies.

Suitable for animals suffering from allergies

Power

Product type

Complementary feed for cats and dogs

Contents

120g, 30 / 90 x 4g

Composition

Leonardite (cellu-ligno-carbon isolate, containing humic acid), shiitake (ground), Agaricus blazei murill (ground), Coriolus versicolor (ground)

Analytical components

Crude protein (7.1%), crude ash (12.9%), crude fiber (3.5%), crude fat (1.4%)

Nutritional additives (per kg)

Vitamin C (37,000mg), vitamin E (4,950mg), zinc oxide (1,152mg)

Daily-recommended dosage

		1x a day	
< 5kg	1 tsp	or	0,5 x
> 5kg	2 tsp	or	1 x
		1x a day	
< 5kg	1 tsp	or	0,5 x
5-10kg	2 tsp	or	1 x
10-20kg	3 tsp	or	1,5 x
20-30kg	4 tsp	or	2 x
30-40kg	4 tsp	or	2 x
+ 10kg	+ 1 tsp	or	+ 0,5 x
1 tsp = ca. 2g			
1 x = ca. 4g			

Power can be mixed into the feed or fed directly. It can be given with the main meals or mixed separately into yogurt, depending on the pet's tolerance.

Possibility of staining the surroundings due to powder dust. The filling level is predefined for technical reasons. Made in Germany.

Ingredients (excerpt)

Shiitake (ground)

The beneficial shiitake mushroom has remarkable immunological activity thanks to its ability to both stimulate and regulate the immune system. Moreover, it provides an additional antioxidant effect that optimally complements the product.

Agaricus blazei Murill (ground)

Agaricus blazei Murill is immunologically active and has immune-stimulating and modulating effects. In addition, it can increase physical and mental resilience.

Coriolus versicolor (ground)

Coriolus versicolor is an immunologically active beneficial mushroom with antiviral, antibacterial and strongly immunostimulating properties. It supports and strengthens the entire organism.

Zinc and vitamin C

Zinc and vitamin C support the immune system. Vitamin C additionally acts as an antioxidant and promotes the bioavailability of the beneficial mushrooms.

Leonardite

Leonardite contains humic acid. This is considered to promote digestion and nutrient absorption as well as strengthen the immune system as it possesses antioxidant properties.

Vitamin E

Vitamin E is a fat-soluble antioxidant that acts as a free radical scavenger, protecting against oxidative stress and cell membrane damage. It plays an important role in maintaining cell health and can help prevent disease and aging processes.
